

Kevin A Fischer

Front-End Web Developer

Email

fischk5@hotmail.com

Phone

(612) 860-1057

Objective

To design practical, purposeful, and pleasing front-end experiences with avidity!

Projects

Make Your Day Web Application

Client: *Make Your Day*

Technology: HTML5 | CSS3 | JavaScript | AngularJS | jQuery | Bootstrap | Git

Roles: Consultant | Web Designer | Front-End Developer

Description:
> Created a website for *Make Your Day*, a business startup out of Bloomington, Minnesota
> Met with client throughout development to clarify scope, vision, and purpose for website
> Delivered web application with placeholder data for client to populate at launch date

Houlihans Website Re-Design

Purpose: Improve *www.houlihans.com* user experience - personal project

Technology: HTML5 | CSS3 | JavaScript | AngularJS | jQuery | Google Maps API | Git

Description:
> Identified barriers to seamless user experience on existing Houlihans web page
> Repurposed the website as a single page application with improved speed and accessibility
> Incorporated Google Maps API to assist in finding directions to a specific site
> Delivered a clear, stable, and responsive user experience

Living Word

Purpose: Fetch Bible verses from an API to display them on the screen – personal project

Technology: HTML5 | CSS3 | JavaScript | AngularJS | jQuery | NET Bible API | Git

Description:
> Built single page application for displaying Bible verses on screen based on user search
> Extensive input verification code written to manage asynchronous calls to API service
> Integrated all features of the API available to developers
> Built a local storage system for verses retrieved from API to limit asynchronous activity and speed up verse display in special case scenarios

Work
